My Skills

HTML5
The standard markup language used to structure and organize content on web pages.
★★★★★

CSS3
A stylesheet language used to control the appearance, layout, and animations of web pages.
★★★★★

Tailwind
A utility-first CSS framework that enables rapid UI development with predefined classes.
★★★★★

JavaScript
A programming language that adds interactivity and dynamic behavior to websites.
★★★★★

TypeScript
A typed superset of JavaScript that improves code reliability and maintainability.
★★★★★

React
A JavaScript library for building fast, interactive, component-based user interfaces.
★★★★★

Next.js
A React framework that provides server-side rendering, routing, and performance optimizations.
★★★★★

Redux
A predictable state management library for application-wide data in React apps.
★★★★★

Docker
A container platform that packages apps and their dependencies into portable containers.
★★★★★

Git
A distributed version control system used to track code changes.
★★★★★

PHP
A server-side scripting language widely used for web development.
★★★★★

WordPress
An open-source CMS used to create and manage websites and blogs.
★★★★★

React Hooks
Functions that let you use state and other React features inside function .
★★★★★

Mantine
An open-source React component library with ready-made UI components.
★★★★★

Figma
A browser-based design and prototyping tool for UI design and team.
★★★★★

React Query
A data-fetching library for React that handles server state, caching, and updates.
★★★★★

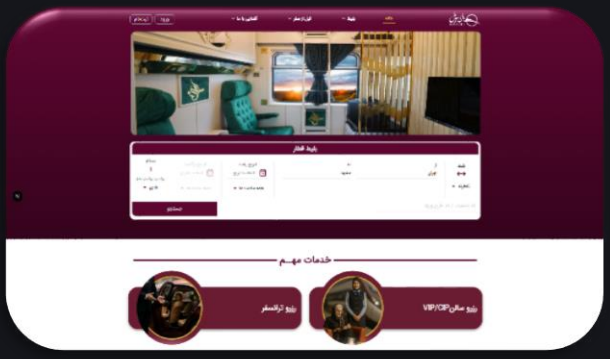

Axios
A promise-based HTTP client for the browser and Node.js used to send API requests.
★★★★★

REST API
An architectural style that uses HTTP methods and resources to exchange data between systems.
★★★★★
